About Me

Senior Software Engineer with **5+ years** of end-to-end product ownership across **fintech, mar-tech, SaaS**, and **AI-native software products**, with experience at **YC** and **Sequoia-backed startups**. Experienced in building scalable backend systems, **real-time AI assistants**, **natural language data interfaces**, and **voice intelligence services**. I **thrive** in fast-moving, cross-functional teams where clean code, data-driven decisions, and relentless optimisation drive outsized impact. Proficient in **NestJS, Node.js, TypeScript, React, GraphQL, Kafka, Redis, PostgreSQL, MongoDB, Elasticsearch, AWS, Docker, Kubernetes**, and **AI-first development tools** including **Cursor** and **Claude Code**.

Work Experience

Freelancer

Remote

SENIOR ENGINEER

June 2025 – Present

- Designed **Helium**, an AI-powered product analytics concept enabling product managers to interact with business data through natural language queries, automatically translating questions into SQL and presenting insights via structured tables and visual charts.
- Built a **Sales AI Assistant** concept for real-time sales conversations, where an AI copilot listens to live calls, identifies buyer questions, objections, and intent signals, and assists sales representatives with contextual talking points, proof points, and next-best actions.
- Developed a **Voice Attribute Service** for analyzing caller attributes from audio, including age bracket, gender, language, and accent detection, using custom audio classifiers, feature extraction, and confidence-based prediction outputs for real-time voice AI workflows.
- Skills:** NestJS, Redis, Postgres, API Design, AI Workflows, Audio Classification, Reliability & Observability

Baraq

Bangalore, India

SENIOR ENGINEER

May 2023 – July 2025

- Transaction Governance & Limits Infrastructure:** Designed and implemented a scalable limits infrastructure module for a high-volume transaction ecosystem processing thousands of transactions daily, enforcing compliance, banking, and operational rules across countries, currencies, transaction amounts, transaction frequencies, and time windows.
- Platform Reliability & Failure Mitigation:** Redesigned error-handling architecture and optimized webhook retry mechanisms, reducing critical system failures by 40% while improving availability, fault tolerance, and service continuity.
- Microservices & Third-Party Integration:** Integrated distributed microservices and third-party platforms, enabling secure, high-performance interoperability and strengthening the overall system architecture.
- Skills:** NestJS, TypeScript, Kafka, Redis, MySQL, AWS, Docker, React, Redux, Javascript, NodeJS

Bitespeed (Sequoia 2019)

Bengaluru, India

SENIOR ENGINEER

Aug 2022 – May 2023

- Marketing Automation & Backend Architecture:** Engineered a scalable backend infrastructure to support multichannel marketing workflows, enhancing campaign orchestration capabilities and driving a 40% improvement in marketing efficiency.
- Conversational Commerce Enablement:** Designed and deployed a WhatsApp chatbot infrastructure integrated with Shopify, enabling 100+ brands to automate customer engagement, sales conversions, and support operations at scale.
- Platform Integration & Data Synchronization:** Built robust product synchronization pipelines between Shopify and Facebook, reducing integration turnaround time by 60% and improving catalog accuracy across platforms.
- Skills:** Node.js, TypeScript, Express.js, MongoDB, Kafka, Redis, WhatsApp Business API, Shopify API, React, Redux

Weekday (Y Combinator W21)

FOUNDING ENGINEER

Bengaluru, India

Nov 2021 – Sep 2022

- **Hiring Automation & Backend Engineering:** Architected backend systems using Node.js and Express.js to automate end-to-end hiring funnel workflows, reducing manual intervention by 50% and streamlining recruitment operations.
- **Frontend Architecture & User Experience Optimization:** Developed a scalable React and Redux-based frontend framework, enhancing usability and increasing user engagement by 35% through improved interface performance and interaction design.
- **Search Performance & Data Optimization:** Implemented advanced Elasticsearch query structures, reducing candidate search latency by 90% and significantly improving system responsiveness.
- **Skills:** Node.js, Express.js, React, Redux, Elasticsearch, MongoDB, AWS

Morgan Stanley

SOFTWARE ENGINEER

Remote

Feb 2021 – Nov 2021

- Developed and optimised APIs for institution forex trade dashboard
- **Skills:** React.js, Node.js, TypeScript, WebSockets, PostgreSQL

Skills

Full-Stack	Node.js, TypeScript, JavaScript, NestJS, Express.js, React.js, Redux, HTML, CSS, Kafka
Databases	MySQL, Amazon Aurora, Amazon RDS, AWS RDS, DynamoDB, Elasticsearch
AWS	AWS EC2, AWS S3, AWS Lambda, AWS Elastic Beanstalk, AWS Beanstalk, Serverless Architecture, Amazon Aurora, Amazon RDS, AWS RDS, DynamoDB, AWS SNS, AWS SQS
Core	Distributed Systems Design, System Architecture & Scalability, Event-Driven Architecture, Backend System Design, High Availability & Fault Tolerance, Performance Optimization, Observability & Monitoring, Database Design & Optimization, Message Queue Systems, API Security & Authentication
Architecture	Orchestration layer, Transaction governance, Scalable transaction governance, Limits infrastructure, High-volume remittance ecosystem, Compliance rules, Regulatory controls, Fault tolerance, Service continuity, Distributed microservice architectures, Cloud-native systems, Microservices, API design, Distributed reliability

Education

Medicaps University

B.TECH IN COMPUTER SCIENCE AND ENGINEERING

India

June. 2016 - June. 2020

Relevant Projects

Helium

Designed a product concept that enables product managers to interact with business data using an AI-powered natural language interface, translating user questions into SQL queries and presenting insights through structured tables and visual charts.

BucketIT

Web platform where new startups can post their product to gain early traction and initial set of users. This platform also helps founders to validate their product. Used Node.JS in backend with MongoDB and used React.JS in frontend

Redesigned Recipe

Cross Platform recipe app built with React Native. Includes all basic features with most exciting features that are suggestion of recipes through available ingredients and searching by nutritional value

E-commerce App

Cross platform e-commerce application built in React Native
