CORE COMPETENCIES

- Distributed Systems Design
- System Architecture & Scalability
- Event-Driven Architecture
- Backend System Design
- High Availability & Fault Tolerance
- Performance Optimization
- Observability & Monitoring
- Database Design & Optimization
- Message Queue Systems
- API Security & Authentication

EDUCATION

- **B.Tech. in Computer Science and Engineering** from **Medicaps University** in 2020

TECHNICAL SKILLS

- **Languages & Backend:** Node.js, TypeScript, JavaScript, NestJS, Express.js
- **Frontend:** React.js, Redux, HTML, CSS
- **Databases & Search:** MySQL, Amazon Aurora, Amazon RDS, DynamoDB, Elasticsearch
- **Messaging & Streaming:** Kafka, AWS SNS, AWS SQS
- **Cloud & Infrastructure:** AWS (EC2, S3, Lambda, Beanstalk), Serverless Architecture

NITISH SAINANI

FULL STACK DEVELOPER

PROFILE SUMMARY

- Senior Software Engineer with **5+ years of experience building scalable backend systems and APIs** for fintech, SaaS, and enterprise platforms, working across high-growth startups and global organizations.
- Designed and scaled **transaction and compliance infrastructure processing thousands of financial transactions daily**, including limits enforcement across currencies, countries, transaction frequencies, and regulatory rules.
- Reduced production failures by **40% by redesigning error handling, retry systems, and observability pipelines**, significantly improving reliability in distributed microservice architectures.
- Built **high-impact product features used by 100+ brands**, including WhatsApp chatbot automation for Shopify and multichannel marketing workflows that improved marketing efficiency by 40%.
- Experienced in **architecting cloud-native systems and microservices** using Node.js, NestJS, Kafka, Redis, PostgreSQL, and AWS, with strong expertise in **API design, event-driven systems, and distributed reliability**.
- Previously contributed to **financial trading dashboards, hiring automation platforms, and AI-driven analytics tools**, delivering scalable products from **early startup stage to production systems used at scale**.

WORK EXPERIENCE

Jul'25-Jan'26 | McLaren SV, Remote | Senior Engineer

- **API Architecture & Observability:** Engineered and continuously optimized API frameworks supporting customer support workflows and authentication systems, strengthening request processing performance and enhancing end-to-end system visibility.
- **Skills:** NestJS, Redis, PostgreSQL, API Design, Reliability & Observability

May'23-Jul'25 | Baraq, Bengaluru | Senior Engineer

- **Transaction Governance & Regulatory Controls:** Designed and implemented a scalable limits infrastructure for a high-volume transaction ecosystem processing thousands of transactions daily.
- **Platform Reliability & Failure Mitigation:** Redesigned error-handling architecture and optimized webhook retry mechanisms, reducing critical system failures by 40% and significantly enhancing availability, fault tolerance, and service continuity.
- **Microservices & Ecosystem Integration:** Directed integration of distributed microservices and third-party platforms, enabling secure, high-performance interoperability and strengthening the overall system architecture.
- **Skills:** NestJS, TypeScript, Kafka, Redis, MySQL, AWS, Docker, React, Redux, JavaScript, NodeJS

Aug'22-May'23 | Bitespeed (Sequoia 2019), Bengaluru | Senior Engineer

- **Marketing Automation & Backend Architecture:** Engineered a scalable backend infrastructure to support multichannel marketing workflows, enhancing campaign orchestration capabilities and driving a 40% improvement in marketing efficiency.

PERSONAL DETAILS

Languages Known: English, Hindi

Location: Bengaluru

Date of Birth: 28th December 1997

- **Conversational Commerce Enablement:** Designed and deployed a WhatsApp chatbot infrastructure integrated with Shopify, enabling 100+ brands to automate customer engagement, sales conversions, and support operations at scale.
- **Platform Integration & Data Synchronization:** Built robust product synchronization pipelines between Shopify and Facebook, reducing integration turnaround time by 60% and improving catalog accuracy across platforms.
- **Compliance & Risk Data Engineering:** Established structured risk data synchronization pipelines across WhatsApp and external partners, strengthening compliance monitoring, audit traceability, and operational transparency.
- **Skills:** Node.js, TypeScript, Express.js, MongoDB, Kafka, Redis, WhatsApp Business API, Shopify API, React, Redux

Nov'21-Sept'22 | Weekday (Y Combinator W21), Bengaluru | Founding Engineer

- **Hiring Automation & Backend Engineering:** Architected backend systems using Node.js and Express.js to automate end-to-end hiring funnel workflows, reducing manual intervention by 50% and streamlining recruitment operations.
- **Frontend Architecture & User Experience Optimization:** Developed a scalable React and Redux-based frontend framework, enhancing usability and increasing user engagement by 35% through improved interface performance and interaction design.
- **Search Performance & Data Optimization:** Implemented advanced Elasticsearch query structures, reducing candidate search latency by 90% and significantly improving system responsiveness.
- **Skills:** Node.js, Express.js, React, Redux, Elasticsearch, MongoDB, AWS

Feb'21-Nov'21 | Morgan Stanley, Bengaluru (Remote) | Software Engineer

- **Forex Trading Dashboard API Development:** Designed, developed, and optimized backend APIs supporting an institutional forex trading dashboard, enhancing real-time data processing, system responsiveness, and transactional reliability.
- **Skills:** React.js, Node.js, TypeScript, WebSockets, PostgreSQL

Jul'20-Feb'21 | Next Labs, Bengaluru (Remote) | Software Engineer

- **Product Development – SEO Analytics Tool:** Designed and built an App Rank SEO tool from the ground up, developing end-to-end architecture and core functionalities to support ranking insights and optimization workflows.
- **Skills:** React.js, Node.js, TypeScript
